

ENVISION NEW MEXICO FY15 Adobe Connect Telehealth Information

Envision New Mexico Pediatric TeleECHO Clinics

Envision New Mexico Pediatric TeleECHO Clinics provide 20 – 30 minutes of a didactic topic followed by your case consultations with our expert consultants. Confidentiality is maintained by de-identification of Protected Health Information (PHI) in accordance with the Health Insurance Portability and Accountability Act of 1996 (HIPAA). The **Case Consultation Request Forms** are available on the Envision NM website <http://envisionnm.org/index.php/telehealth/>. The goal of Envision New Mexico Pediatric TeleECHO Clinics is to enable providers to treat patients with chronic, complex diseases in their home communities with the same level of expertise given at a major medical center.

PNT – Pediatric Nutrition TeleECHO Community of Care links Registered Dietitians (RD) and other medical providers with expertise in pediatric nutrition around the State of New Mexico with rural nutrition and medical care providers to offer instruction and support regarding care for children in the practice of nutrition (Medical Nutrition Therapy).

APT – Asthma / Pulmonary TeleECHO clinics offer primary care providers an opportunity to seek input on the evaluation and management of their asthma/pulmonary patients.

OPEN MICC – Motivational Interviewing Case Consultation is a clinical consultation service intended for medical and behavioral health providers focusing on the use of MI techniques. Clinical cases will be discussed and didactic training will be offered. Discuss your clinical challenges with a subject matter expert.

Envision New Mexico Pediatric Telehealth Clinics

SBHC QII – School-Based Health Center Quality Improvement telehealth sessions link ENM faculty, staff, and guest faculty to SBHC primary health care and behavioral health providers around New Mexico. Core topics for provider education and support are directed toward all SBHC providers especially those embarking on enhanced practice and QI.

DSI – Developmental Screening Initiative telehealth sessions links UNM specialists in pediatric developmental care with community and rural primary health care providers. DSI promotes the use of standardized developmental screening tools and appropriate referral to ensure that no child reaches kindergarten with an undiagnosed developmental disability.

Hot Topics in NM Pediatrics Telehealth – Timely updates on new pediatric research to meet the needs of NM pediatricians and to address updates and the latest recommendations/discoveries.
